

Human Builder Work Bench  
Ergonomics & Design Analysis

Insert new Manikin

We like to use 90% = 5ft 10"

You can change the Percentile and options shown under each of these tabs labeled in Red

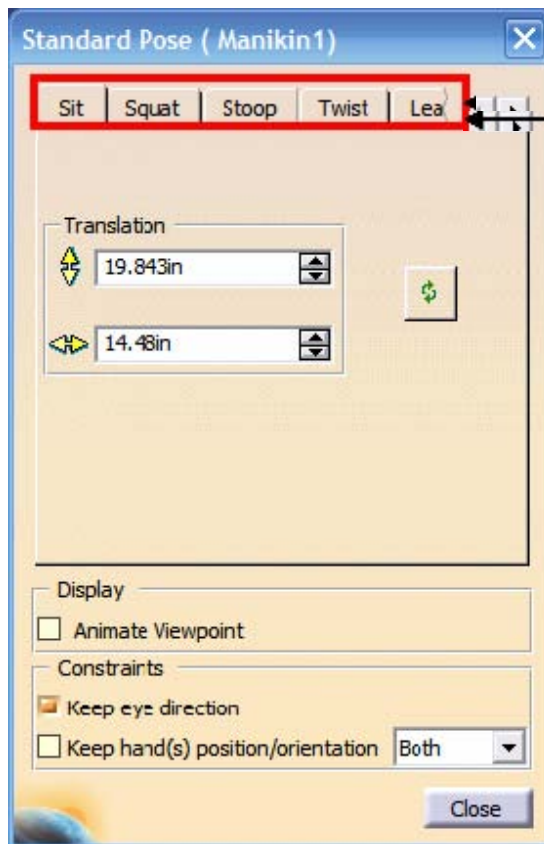

If you click OK

Then your Manikin will look like this below

Click Here  
Manikin standard pose

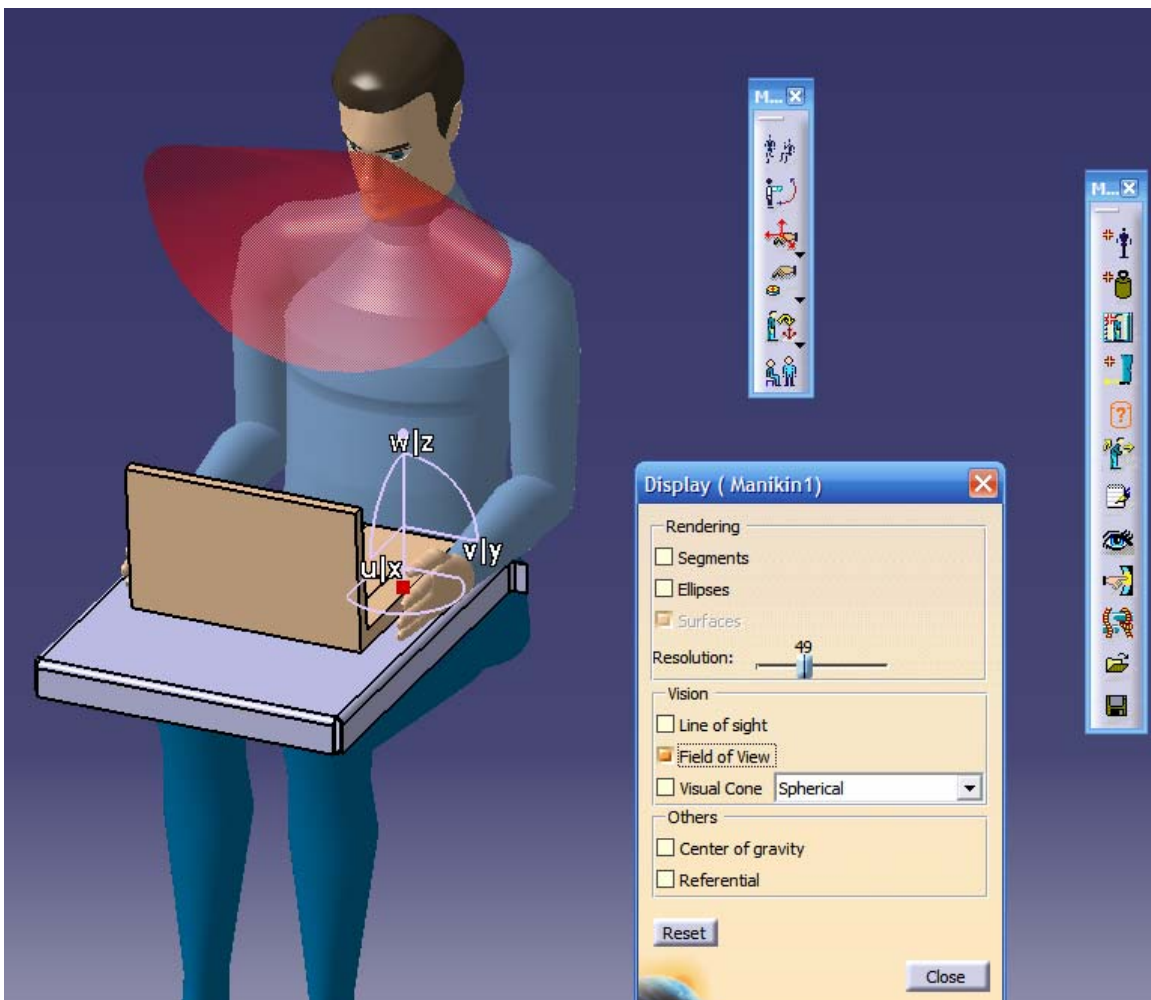

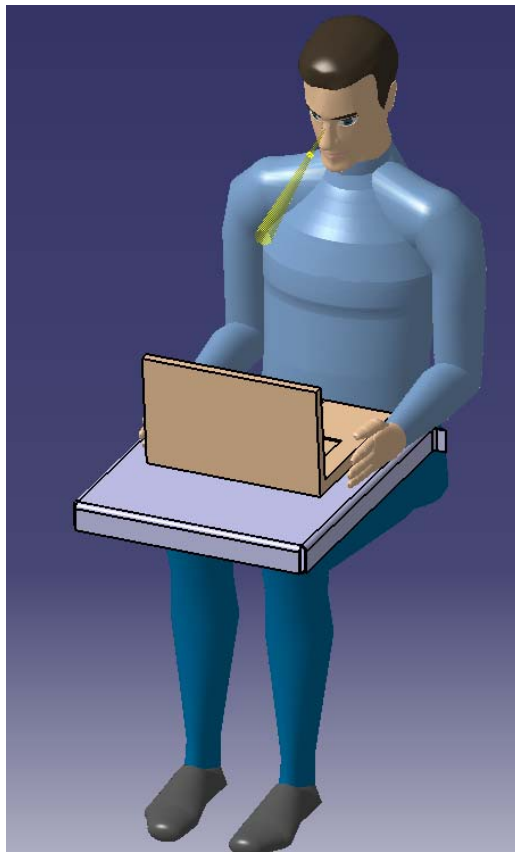

Click thru the top Tabs you can utilize these powerful commands lean, sit, stoop, twist, squat, adjust elbow.

The Posture Editor Icon tilts the head and has many other posture positions.

To make a Human in Catia V5 is extremely fast, this posture position below should not take more than 15minutes. To give you an idea this took me 3 minutes to make and 40 minutes to create this hokey pokey pdf.
